Kogan, M. N.

ON FLOWS WITH GREAT THERMAL CONDUCTIVITY. [1960] 4p. 2 refs.

Order from LC or SLA ml\$1.80, ph\$1.80 61-10379

Trans. of Akad[emiya] Nauk SSSR. Dokl[ady] 1959, v. 128 [no. 3] p. 488-[490].

The equation

$$q_T = -k_w \frac{\partial T}{\partial y} \Big|_{y=0} = k_w (T_w - T_\infty) \frac{1}{\sqrt{\pi}} \sqrt{\frac{C_p \rho_\infty \mu_\infty}{k_\infty x}}$$

is derived for the heat transferred to the heat layer. For very great thermo-conductivity the equations

$$\frac{\partial u}{\partial x} (1 - M_\infty^2) + \frac{\partial v}{\partial y} = \frac{u_\infty}{T_\infty} \frac{\partial T}{\partial x}$$

and

$$\frac{\partial u}{\partial y} - \frac{\partial v}{\partial x} = 0$$

are derived, where u, v, etc. are the parameters of disturbed flow.
